

PLASTIC CRATES

This plastic crate, manufactured using modern injection molding technology, is sturdy, durable, and lightweight. Its versatility makes it ideal for use in the home and garden. Its design ensures good air circulation and protects stored produce, keeping it fresh for longer. Practical, stable, and easy to wash – the ideal everyday helper.

Crate advantages:

- Fully recyclable product.
- Reusable.
- Easily stackable.
- Punching allows air circulation and outlet of undesirable fluid.
